

“The RCAST Graduate School” - Broad Scope, Deep Research-

Briefing on admission to the Department of Advanced Interdisciplinary Studies, Graduate School of Engineering, The University of Tokyo for the 2019 academic year

RCAST does more than just conduct research. The provision of education is another of its key functions. Students enrolled in the doctoral programs of the Department of Advanced Interdisciplinary Studies, which is operated by RCAST, can receive a graduate school education while simultaneously conducting research at specialist research units (ancillary labs). At the briefing, Professors Yasunobu Nakamura and Hiroshi Ishikita, who work on the frontline of research and education, will describe the characteristics and attractions of the graduate school, in which numerous working professionals from corporations etc. are enrolled.

Anyone is welcome to attend. Those planning to seek admission this year will obviously benefit, but so will those who are considering admission as an option for the future and want to learn more, as will those who have been surprised to discover that such a graduate school exists.

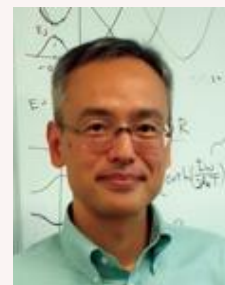

31 May (Fri.), 2019
18:00 – 19:00

Lecture Room, 2nd floor, RCAST BLDG.4, RCAST

UTokyo Komaba Research Campus
